

SkillQuest[®]

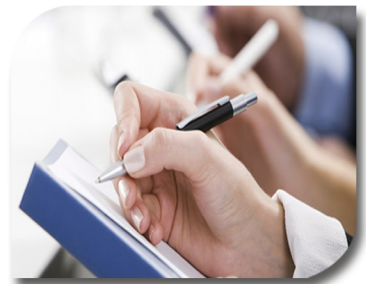

Skills Assessment & Management System

SkillQuest[®] is a ASP Hosted skills and competency management system that incorporates more than twenty years of experience in the skills management business

SkillQuest[®] is designed to:

- Identify and assess employee skills strengths and weaknesses
- Prepare development plans to improve skills and facilitate career development
- Align skills with training and development resources, select, track and manage training
- Capture skills for resource management, employee search and gap analysis
- Provide the foundation for a skills-based compensation system
- Facilitate the reengineering of jobs and job families by analyzing their primary skills
- Conduct core skills migration from aging skills sets to newer ones
